

WARM DIM RIBBONLYTE

Tight LED spacing minimizes or even eliminates hot spots (depending on channel/lens used)

- 5.2 W/ft at full brightness
- 310 lm/ft - just less than 4.4 Static White RibbonLyte
- Works with standard 0-10V dimmer or dimming system
- Cuttable every 3.94 In (100mm)
- 24 VDC Voltage
- Ideal for coves where warm ambient lighting is desired

100% 2900K 75% 2700K 50% 2450K 25% 2225K 1% 2000K

Warm white at full brightness that gets even warmer as it dims, just like an incandescent lamp!

All the qualities of incandescent light with the energy efficiency of LEDs

Dual chip LEDs allow dimming from 2900K at full brightness down to 2000K with excellent color mixing as you dim
