#### FLEXIBLE BACKLYTE

Our Flexible BackLyte products are perfect for backlighting translucent objects such as onyx, stone and resin panels. Newly updated with double the number of LEDs, several wattage options and improved efficacy across the board, our Flexible BackLyte can be bent and cut to match the size of your application. We've also improved our connections, adding variable terminal locations with custom options and shorter jumpers that won't ever impede your LED display. Each flexible 11.97-in. square panel features 9 cuttable 3.99-in. square sections that contain an array of 16 pixels to illuminate uniquely shaped spaces. Daisy chain up to 24 Static White 3.2 W panels for larger shapes! Our Flexible BackLyte is lightweight, provides even light distribution and can be fully customized in Static White, Variable White or RGBW.

- 9 Static White CCTs from 1800K to 6000K
- Variable White ranges from 2400K to 6100K
- RGBW (3000K, 4000K or 5000K)
- Daisy chain up to 24 Static White 3.2 W panels
- · Improved efficacy and total lumen output
- Min. bending radius: 2.95 in. (75 mm)
- 6-year warranty

## Applications:

Commercial Entertainment Healthcare

Hospitality Museums **Public Spaces**  Residential Retail

RoHS

**IP20**

# TRIMMING AND POWER INPUT CORNERS / USAGE GUIDELINES

#### TRIMMING AND POWER INPUT CORNERS

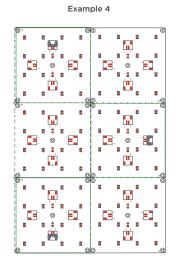

Any of the 4 power input corners (outlined in green) can supply power to the entire sheet of Flexible BackLyte. The Flexible BackLyte can be trimmed into the desired shape along the dotted lines and be powered up with any one of the 4 power input corners. See examples below:

Example 1

Example 3

#### USAGE GUIDELINES

- $\cdot$  Use with non-Acolyte supplied drivers and interfaces is not supported or warrantied.
- · We reserve the right to make changes to product lineup, specifications, design and finishes at any time without notice.
