## CONTOUR W/ MOUNTING CLIPS:

1. Place the mounting clips every 6 in. (150 mm) along the desired path of the Neon Contour and mark the locations for pilot hole drilling.

2. Drill pilot holes and then fasten the mounting clips to the surface using the screws.

3. Push the Neon Contour into place in the mounting clips and make all necessary electrical connections. All wires should be exposed, and the product is sealed. Do not cut the channel or remove end caps.
4. Installation complete.

CONTOUR W/ MOUNTING CHANNEL:

1. Place the mounting channel along the desired path of the Neon Contour and mark the locations for pilot hole drilling.

2. Drill pilot holes and then fasten the mounting channel to the surface using the screws.

3. Push the Neon Contour into place in the mounting channel and make all necessary electrical connections. All wires should be exposed, and the product is sealed. Do not cut the channel or remove end caps.
4. Installation complete.

SILHOUETTE W/ MOUNTING CLIPS:

1. Place the mounting clips along the desired path of the Neon Silhouette every 6 in. (150 mm) and mark the locations for pilot hole drilling.

2. Drill pilot holes and then fasten the mounting clips to the surface using the screws.
3. Push the Neon Silhouette into place in the mounting clips and make all necessary electrical connections. All wires should be exposed, and the product is sealed. Do not cut the channel or remove end caps.

4. Installation complete.

SILHOUETTE W/ MOUNTING CHANNEL:

1. Place the mounting channel along the desired path of the Neon Silhouette and mark the locations for pilot hole drilling.

2. Drill pilot holes and then fasten the mounting channel to the surface using the screws.

3. Push the Neon Silhouette into place in the mounting channel and make all necessary electrical connections. All wires should be exposed, and the product is sealed. Do not cut the channel or remove end caps.

4. Installation complete.
