

RGBW ADDRESSABLE RIBBONLYTE

RGBW Addressable RibbonLyte allows you to create completely customized patterns of light that are only limited by the imagination. Each 4-in. pixel can be individually controlled. Pair RGBW Addressable RibbonLyte with simple DMX systems to program moving effects, patterns, chases and more to create an unforgettable light display.

- 6.0 W/ft (19.7 W/m)
- 6 LEDs per pixel (18 LEDs/ft, 60 LEDs/m)
- 3.94 in. (100 mm) cuttable length
- 16 ft, 5.83 in. (5.025 m) max. run length (longer sections can be illuminated with multiple pieces of RibbonLyte with lead wire back to the controller or opto splitter)
- 120 degree beam angle
- Controlled with DMX512
- IP67 rating
- 24V input
- Closet rated (stand-alone or in surface channels)

USAGE GUIDELINES

- IP67 RibbonLyte cannot be cut in the field. All custom cuts and connections for these models must be performed at the factory to ensure waterproofing standards are met. Any modification of the waterproofing will result in a void warranty.
- When installing this product, consider the surface temperature of the material where it will be mounted. Many building surfaces which are exposed to direct sunlight exceed the 70° C / 158° F maximum for which our product is rated. High-risk locations like this should be avoided.
- IP20 RibbonLyte products are for indoor use in dry areas. IP65 RibbonLyte products can be used in indoor dry/damp locations such as bathrooms and kitchens. IP67 and IP68 RibbonLyte products can be used in wet, outdoor locations around pools and spa tubs, but our products are not intended to be submerged in pools and fountains and do not carry UL676 certification to do so.
- Please refer to the RibbonLyte Proper Usage Guide in our Application Guide for more information. Available for download at AcolyteLED.com.
- This product is compatible with a wide variety of control products including the entire line of Lutron dimming systems.
- For use with Acolyte drivers, 0-10V dimming modules and interface controllers (DMXINF models).
- Use with non-Acolyte supplied drivers is not supported or warranted.
- Due to the nature of RibbonLyte products, cuttable lengths are generally longer or shorter than the customer requested length unless specified, RibbonLyte is factory cut at the shorter cuttable point.
- We reserve the right to make changes to product lineup, specifications, design and finishes at any time without notice.

WIRING DIAGRAMS

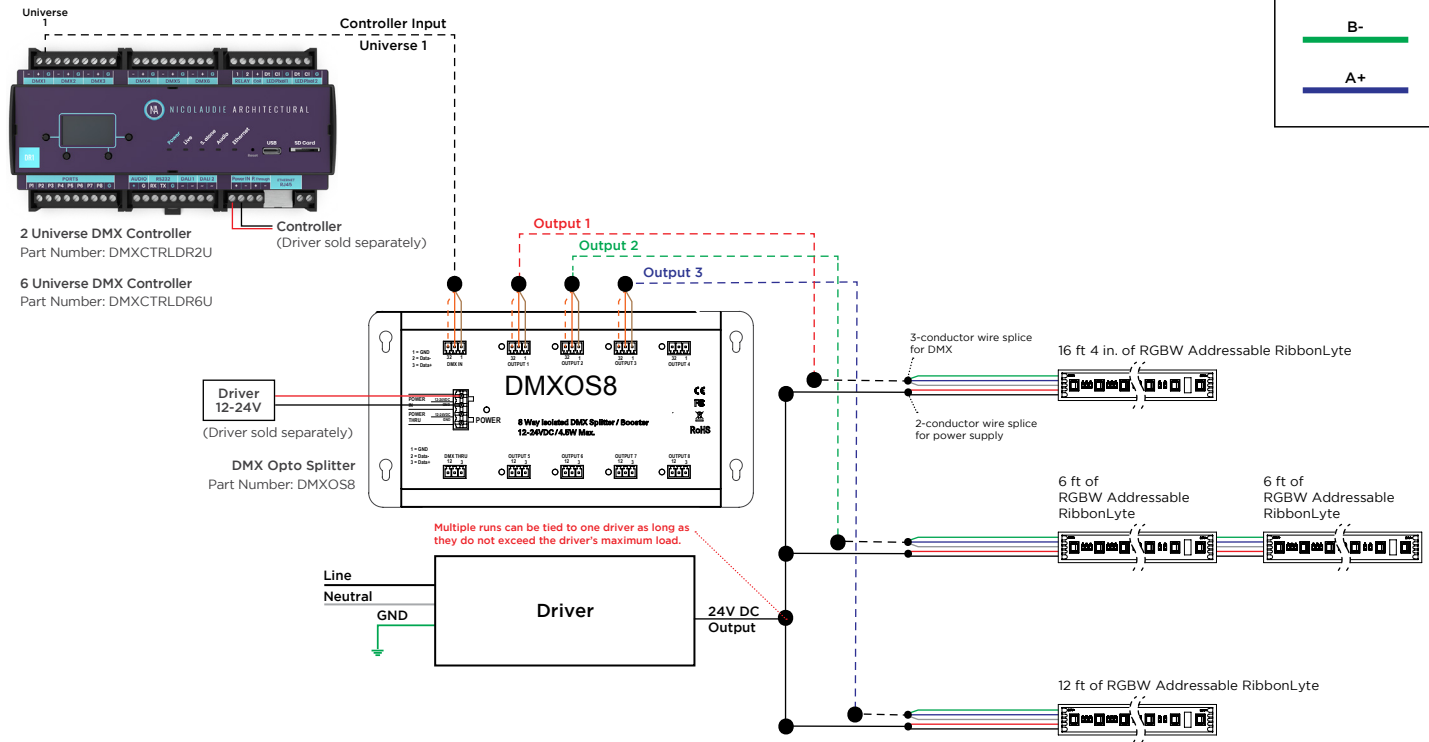

One DMX Universe consists of 128 addresses and 512 channels (42 ft, 8 in. of RibbonLyte).

Any single run of RibbonLyte that is less than 16 ft, 4 in. can be wired directly to the controller.

For additional runs, Opto Splitter must be used. Each individual run will need its own Opto Splitter output.
