

NOTE: The Piccolo fixture is rated IP20 for indoor use. Do not install in damp or wet locations.

FOR RECESSED APPLICATIONS

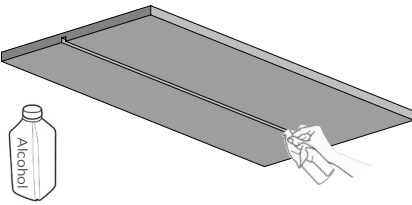

1. Measure and mark the desired path of the channel on the mounting surface.

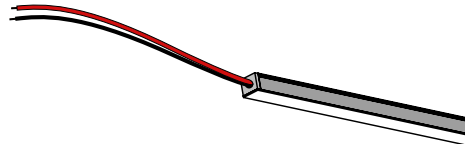

2. Cut a recess in the surface to match the size of the fixture. Drill any holes necessary for power feeds.

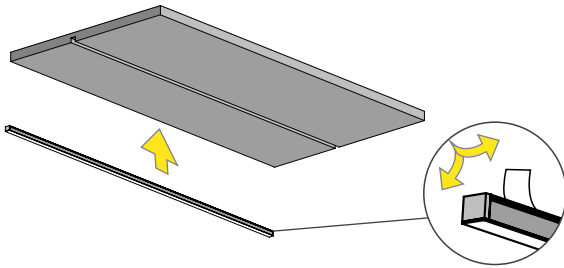

3. Clean the channel mounting surface so that it is free of dust and debris using a cloth and rubbing alcohol.

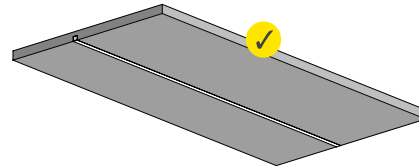

4. After the surface has dried, make all necessary electrical connections.

5. Remove VHB tape backing, insert fixture and apply appropriate pressure to secure fixture.

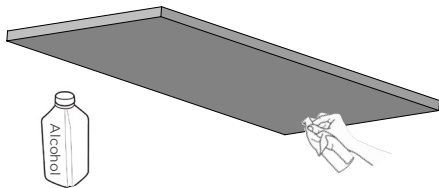

6. Installation complete.

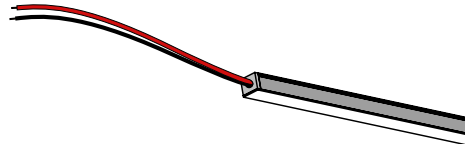

FOR SURFACE MOUNTED APPLICATIONS

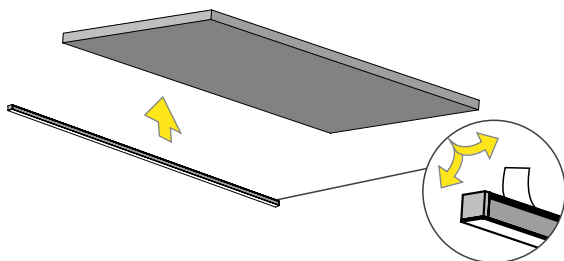

1. Using a cloth and rubbing alcohol, clean the mounting surface so that it is free of dust and debris.

2. Make all necessary electrical connections.

3. Remove VHB tape backing, apply fixture to surface and apply appropriate pressure to secure fixture.

4. Installation complete.
