

ARMOR SERIES | TRINODE

Armor Series TriNodes are versatile single-point source 24V or 48V RGB or RGBW fixtures that can be used to create a unique pixel display or to highlight architectural details. Program with simple SPI (Serial Peripheral Interface) controls for maximum effects. Each TriNode module contains three LEDs (add white LED for RGBW) for precise color gradients and smooth transitions. Choose from flat or globe lenses and customize your pixel spacing and quantity.

- Pinpoint lighting for custom façade displays
- RGB at 19 lm/node (all on)
- RGBW (2700K) at 24 lm/node (all on)
- Flat lens with 110°x110° beam angle
- Globe lens with 160°x160° beam angle
- Uses SPI controls
- Custom pixel spacing (starting at 3.94 in./100 mm)
- Replace single modules for easy maintenance
- Daisy chain up to 492 ft (150 m)
- Use with anodized mounting channel (up to 6 ft 6.74 in./2 m)
Powder coating available (extra charge)
- Single mounting clips
- IP67
- 5-year warranty
