

94W ATHENA WIRELESS COMPATIBLE 1 CHANNEL DRIVER

This UL Listed constant voltage Class 2 intelligent LED driver provides high efficiency and great heat dissipation with dimmable 24V output. Offering wireless compatibility with the Lutron Athena control system, it features an enclosure with isolated wire connections. With 120-277V AC input voltage, this dimmable driver is suitable for LED lighting in commercial, industrial and residential applications.

- Constant voltage dimmable driver
- Lutron Athena Wireless compatibility
- High efficiency and high power factor
- Short circuit and constant power protection
- Overtemperature and overload protection
- Lightning surge protection
- Lumen output compensation
- Dimming range from 100% to 1%
- 6-year warranty

NOTE: Lutron specifies that Athena Wireless Nodes should be installed within 25 ft (7.62 m) of two or more Athena Wireless Nodes. Walls, ceilings and some signals may interfere with Athena and reduce this distance.

SPECIFICATIONS

Driver Type	Constant Voltage	Dimming Output Type	PWM
Rated Input Voltage Range	120-277V AC	Ambient Operating Temperature	-40 to 122°F (-40 to 50°C)
Input Frequency	47-63Hz	Storage Temperature	-40 to 185°F (-40 to 85°C)
Input Current	0.97A @ 120V AC	Max Relative Humidity	95% RH
THD	< 10%	Overvoltage Protection	Yes
Power Factor	PF≥0.98/120V	Short Circuit Protection	Yes
Output Power	94W	Over Temperature Protection	Yes
Output Voltage	24V (24-26V)	UL Standards	UL 8750
Output Current	4.0A	EMI Compliance	FCC Part 15 CLASS B
Efficiency @ Full Load	>91%@277V AC	Warranty	6 years
Dimming Control	DALI		
Dimming Range	100%-1%		

ORDERING GUIDE

Category	Voltage	Wattage	Compatibility
DRVW	24	94	ATH1CH
DRVW - Driver	24 - 24V DC Output	94 - 94W	ATH1CH - Lutron Athena Wireless Compatible 1 Channel

MAXIMUM DISTANCE FROM DRIVER TO LED AT FULL LOAD

94 W

Wire Gauge	Feet	Meters
24 AWG / 0.25 mm ²	5.5	1.68
22 AWG / 0.34 mm ²	9	2.74
20 AWG / 0.5 mm ²	14	4.27
18 AWG / 0.75 mm ²	23	7.01
16 AWG / 15 mm ²	37	11.28
14 AWG / 2.5 mm ²	59	17.99
12 AWG / 4 mm ²	94	28.66
10 AWG / 6 mm ²	150	45.73
8 AWG / 10 mm ²	239	72.87

ACTIVATING DALI BUS POWER

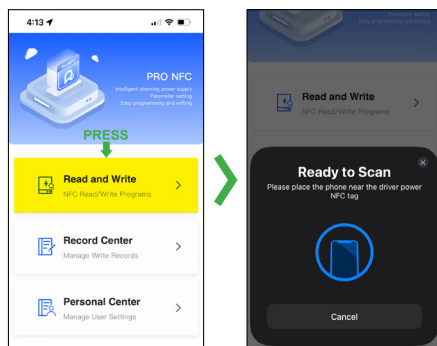

NOTE:

The maximum number of drivers that can be connected to the same DALI bus circuit is four (4). The amperage in each driver with DALI bus power turned on is 56 mA, while the maximum current on which the DALI bus circuit can operate is 250 mA. DO NOT connect five (5) or more drivers with DALI bus power turned on.

This procedure can be done with any iPhone or Android device.

1. Download the **ProNFC** app from the applicable App Store or Google Play Store.
2. Open the App and press the '**Read and Write**' button on the home page. A "**Ready to Scan**" message should appear on the screen.

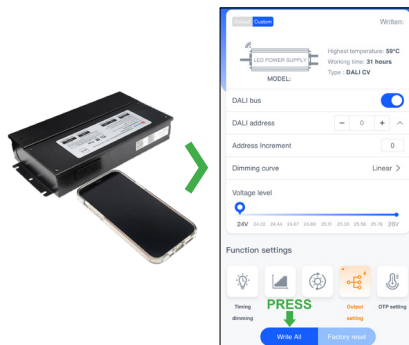

3. Connect the App to the driver by holding the top of the phone (the camera end) to the NFC tag on the driver.

4. A "Reading Success" message with a check mark should pop up, confirming the App and the driver have connected.

5. The App should then show the "Writing Drivers" page. Press the "**Output setting**" tab at the bottom of the screen. In the "DALI bus" row, toggle **DALI bus power ON**. (The slider should move from left to right and change color from gray to blue.)

6. Hold the top of the phone to the driver and press the "**Write All**" button.
