

3.0 STATIC WHITE LINEA EDGE RIBBONLYTE

Static White Linea Edge RibbonLyte is a top-bending, side-illuminated LED ribbon that features a “chip on board” design and a special raised coating that delivers diode-free light even without a diffuser lens. A tight pitch of 12 LED chips per inch (480 LEDs/m) ensures that high-CRI Static White Linea Edge RibbonLyte won't show individual diodes in any of four dimmable CCTs (2700K, 3000K, 4000K, 6000K). Optimal uses for Static White Linea Edge RibbonLyte include architectural accent lighting, backlighting for curved surfaces, installations under bars and counters, mirror edges and custom coves.

- Side-illuminating LED ribbon
- Diode-free without a fixture
- 3.0 W/ft (9.8 W/m)
- 2700K, 3000K, 4000K, 6000K
- 1.31 in. (33.3 mm) cut lengths
- 65 lm/W
- 189 lm/ft (620 lm/m)
- 45° beam angle
- 90+ CRI
- TM66 assessed

USAGE GUIDELINES

- When installing this product, consider the surface temperature of the material where it will be mounted. Many building surfaces which are exposed to direct sunlight exceed the 80 °C / 176 °F maximum for which our product is rated. High-risk locations like this should be avoided.
- IP20 RibbonLyte products are for indoor use in dry areas.
- Please refer to the RibbonLyte Proper Usage Guide in our Application Guide for more information. Available for download at AcolyteLED.com.
- This product is compatible with a wide variety of control products including the entire line of Lutron dimming systems.
- For use with Acolyte drivers, 0-10V dimming modules and interface controllers (DMXINF models).
- Use with non-Acolyte supplied drivers is not supported or warranted.
- Due to the nature of RibbonLyte products, cuttable lengths are generally longer or shorter than the customer requested length. Unless specified, RibbonLyte is factory cut at the shorter cuttable point.
- We reserve the right to make changes to product lineup, specifications, design and finishes at any time without notice.

NOTE: Quotes use nominal values. We highly recommend using nominal wattages for all customer calculations. Allow for a 15% buffer (10% driver, 5% fixture) in these calculations as performance may vary. Acolyte is not liable for product performance if these tables are used instead of nominal values when orders are placed.
